TCIA New Collection Proposal

Please answer the questions below to allow the TCIA Advisory Group to review your proposal. The group meets monthly to review new proposals. You will be invited to the next upcoming meeting to review your proposal and answer any questions. Email help@cancerimagingarchive.net with any questions.

1. Provide a scientific point of contact. (Please include name, email, and phone number for the person who we can contact to resolve any questions about this proposal and how the data were collected.)

2. Who will we work with to obtain the data? (Please provide a name, email, and phone number for any technical point(s) of contact who will be involved in sending us your data.)

3. Do you need to request any exceptions to TCIA's Open Access & Usage Policy?
In support of FAIR Principles TCIA's default policy is to make all data 100% publicly accessible under the Creative Commons Attribution 4.0 International License. In rare cases, we may be willing to explore exceptions to this policy.

Data Access Exception (e.g. data is only accessible by request during an embargo period)

4. What type of cancer was studied using these data?

5. Suggest a descriptive title for your data set

6. List the authors of this data set.(Please list all authors in the order you'd like them to appear if the data set is published on TCIA. Please include all author's OrcIDs as well.)

7. How many subjects are in your data set?

8. How many total DICOM studies or pathology slides are in your data set?

9. Which image types are included in the data set?

MR   PET-MR   Radiation Therapy (RTSTRUCT, RTDOSE, RTPLAN)
CT   Mammograms   Pathology
PET   Ultrasound   Other:
PET-CT   X-ray

10. Which kinds of supporting data are included in the data set?

Clinical (e.g. patient demographics, outcomes)

Image Analyses (e.g. segmentations, radiologist/pathologist reports, image features)

Image Registrations

Genomics (e.g. gene expression, copy number variation, methylation)

Proteomics (e.g. mass spectrometry, protein arrays)

Software / Source Code

No additional data besides DICOM

Other:

11.What is the approximate disk space that would be required to store your data set?

12. Specify the file format utilized for each type of data you'll be submitting.

12. Please describe any steps you've taken to modify your data prior to submitting it us.

13. Provide an abstract which describes your data set.

14. How will other researchers benefit if we add your data to TCIA?

15. Please list any additional acknowledgments or funding statements you'd like us to notify users about if your data is accepted.

16. If there is a publication you would like people to cite when utilizing this data please provide the citation.

17. If there are any additional publications about this data set please list them. As a convenience to TCIA users we list these at http://www.cancerimagingarchive.net/related-publications/.

18. Are there any time constraints associated with sharing your data set?

By clicking "Submit Form" the completed form will be attached to an email and sent to TCIA via your email client. If you are unable to submit your completed form by using the button, use the "Save Form" button to save form as a PDF and email to help@cancerimagingarchive.net. If neither button works, save completed form and email directly to help@cancerimagingarchive.net. If you have any questions please email help@cancerimagingarchive.net.
